SARS-CoV-2 is the etiological agent responsible for the global COVID-19 outbreak. The main protease (Mpro) of SARS-CoV-2 is a key enzyme that plays a pivotal role in mediating viral replication and transcription. We designed and synthesized two lead compounds (11a and 11b) targeting Mpro. Both exhibited excellent inhibitory activity and potent anti-SARS-CoV-2 infection

Interior design is both a science and an art. When designing a space, we are creatively working to evoke a particular concept or emotion. This is the same process a painter uses. He starts with an idea or inspiration he'd like to convey. He develops this into a full concept and then paints that gorgeous piece we see hanging in the museum.
