Course Description STAT 5302 is the second course in a two-semester sequence in Intermediate Data Analysis (5301- 5302). We assume that students are familiar with organizing and summarizing data, the nature of relationships between variables, sampling distributions and the underlying rationale for hypothesis tests and condence intervals.

### **The Statistical Sleuth A Course in Methods of Data ...**

The Starting Point At first glance, the first four chapters of The Statistical Sleuth appear to rehash the topics of one-sample and two-sample analysis, which are covered in introductory courses. This is not the case. These chapters are intended as a model for how topics in the rest of the book are treated.
